

## Energy Conservation Funding

### Overview

With the limitation of natural resources across the country, Energy Conservation programs have emerged with the aim of reducing the use of hydro, gas and water residentially and industrially.

### Who is Eligible

Property owners are eligible to apply for Energy Conservation Funding.

### Examples of Qualifying Projects

Funding is available across Canada, and varies per Province. Examples of qualifying projects across the country include:

- retrofitting of lighting and fixtures to energy efficient solutions
- air conditioning upgrades and replacement
- boiler upgrades and replacement
- furnace upgrades and replacement
- water reuse projects i.e. closed loop cooling systems

### Funding:

Funding is up to 50% of project costs.
